SUMMARY OF QUALIFICATIONS

- Proficient in backend web development using ExpressJS, Node.js, and SQL databases with a strong focus on creating robust APIs and system optimization.
- Experienced in frontend development using ReactJS and TypeScript to build dynamic and responsive user interfaces.
- Skilled in project management, curriculum development, and technical mentoring with a track record of producing proficient web developers.
- Knowledgeable in AI and cybersecurity implementations, including IBM Watson Assistant for chatbot development and Trufflehog for credential detection.
- Red Hat Certified System Administrator with hands-on experience in Linux system management and containerization.
- Proactive problem solver with excellent team-building and collaboration skills to deliver efficient and user-focused solutions.

EDUCATION

Batam State Polytechnic — Batam, Indonesia
Associate Degree, Informatics Engineering — Aug 2024
Emphasis, Web Development — Major GPA: 3.61/4.00

RELEVANT COURSEWORK

Software Engineering, Web Development, Simulation and Modeling, Database Management, Compilers, Red Hat Certified System Administrator, Artificial Intelligence Development, Cybersecurity Fundamentals

TECHNICAL SKILLS

Programming Languages: Javascript, Typescript, SQL, C++, Java, Python, Php
Operating Systems: Windows, Linux, Ubuntu
Database: SQL Server, MySql, PostgreSql, MongoDb
Software: Bitbucket, Git, SQL, DB2, MS FrontPage/Teams, Zoom, Miro

WORK EXPERIENCE

PT. Global Pratama Group, Batu Ampar — Batam, Indonesia
Programmer — May 2025 – Now

- Designed and developed a comprehensive depot management system to support company operations, including complex container handling processes for both IN and OUT transactions.
- Built and maintained administrative modules for employee management, including attendance, roles, and internal workflows.
- Collaborated closely with stakeholders to understand business requirements and translate them into scalable technical solutions.
- Utilized React.js for the frontend, Express.js and Node.js for the backend API services, and MySQL as the relational database.
- Ensured system reliability, optimized performance, and implemented features based on evolving operational needs.
- Developed and maintained modules in the company's internal SuperApp using PHP and MySQL, including e-Purchasing, e-Finance, eAsset, E-Voucher, Solar Request, and Matrix User.
- Built approval workflows for Finance and Purchasing, including Cancellation Approval and Delegation Approval, and fixed approval logic issues found after release.
- Developed GI Link to WO to connect Goods Issue with Work Order details and prevent the same GI from being created twice.
- Built EStorage, a module for monitoring files stored on Synology across all SuperApp modules, covering millions of files in total.
- Fixed production issues, handled deployments including after-hours releases, and delivered new features requested by users.

Infinite Learning Indonesia, Nongsa Digital Park — Batam, Indonesia
Lead Mentor Technical Web — Feb 2024 – Aug 2024

- Strategically planned training activities for the Kampus Merdeka program and external web development projects.
- Conducted hands-on training in frontend development using ReactJS and backend development with ExpressJS and MySQL.
- Collaborated with managers and leaders to design curricula that aligned with current industry trends.

Infinite Learning Indonesia, Nongsa Digital Park — Batam, Indonesia
Mentor Technical Web — Jun 2023 – Dec 2023

- Designed and delivered a comprehensive programming and web development curriculum, training IT and non-IT mentees.
- Guided mentees in developing proficiency in HTML, CSS, JavaScript, ReactJS, and backend technologies.
- Produced high-quality developers through bootcamps, including programs for teachers and students in Batam.

MSIB Red Hat & IBM AI Nongsa Digital Park, Batam
Intern Feb 2023 – Aug 2023

- Mastered Linux commands and data management using Red Hat Enterprise Linux.
- Developed and implemented AI-powered chatbots using IBM Watson Assistant and Watson Discovery.
- Built containerized solutions for data management systems.

PROJECT EXPERIENCE

SuperApp – PT. Global Pratama Group 2025 – Now

- Developed and maintained business modules for the company's internal SuperApp using PHP, MySQL, and JavaScript, covering e-Purchasing, e-Finance, eAsset, E-Voucher, Solar Request, and Matrix User.
- Built approval workflows for e-Finance and e-Purchasing, including Cancellation Approval and Delegation Approval, and fixed logic issues found after users started using them.
- Developed GI Link to WO, loading Work Order items that have not been issued yet and blocking duplicate GI creation.
- Developed Solar Request and Matrix User, and maintained E-Voucher and eAsset, including company and user access in eAsset.
- Built EStorage to monitor files on Synology across all SuperApp modules, covering millions of files in total.
- Troubleshot production issues and handled releases, including Matrix User deployment outside working hours.

Depot Management System – PT. Global Pratama Group 2025

- Developed a fullstack web-based depot management system using React.js for the frontend and Express.js/Node.js for the backend.
- Designed and implemented complex workflows for container IN and OUT processes, ensuring accurate tracking and operational flow.
- Built employee administration modules including user roles, attendance tracking, and internal task handling.
- Structured and optimized a MySQL database to maintain relational integrity and high performance.
- Collaborated directly with operational teams to align technical solutions with real-world depot procedures.

Reminder & E-Sign System - KPP SI PRIMA **(**Client**)** Jul 2025

- Developed a fullstack reminder application for document workflows and user task tracking, using React.js (Vite) and Express.js.
- Integrated WhatsApp API for sending automated reminders to users based on schedule, priority, and role.
- Designed a multi-role system with Admin, Surveyor, Engineering, Signer, FATB PELH, and KPHO Monitoring, each with tailored access and task flows.
- Implemented document upload, preview, and e-signature features to support end-to-end digital approvals.
- Created a dashboard with data monitoring, document status tracking, and real-time notification capabilities.
- Structured the backend with MySQL, optimizing for performance, relationships, and flexible role-based permissions.

Extracurricular Management System, SMA Negeri 8 Batam Aug 2024

- Designed and implemented a full-stack web application for managing student extracurricular activities.
- Developed the backend using ExpressJS and MySQL to ensure efficient data storage and retrieval.
- Integrated ReactJS for a responsive and user-friendly frontend.

Web-based Project Collaboration Application (Fullstack) Dec 2024

- Developed a fullstack web-based project collaboration tool using React.js (Vite) for the frontend and Express.js for the backend.
- Implemented secure and efficient RESTful APIs to manage user authentication, task assignments, and real-time project updates.
- Designed and optimized a MySQL database to ensure seamless data storage, querying, and relationship integrity.
- Integrated Role-Based Access Control (RBAC) with three distinct user roles—Admin, Manager, and Employee—to enforce granular access control and permission management.
- Ensured a responsive and user-friendly UI with dynamic task tracking and project overview dashboards.

Trufflehog Web-Based Credential Detection Jun 2024

- Implemented a system to detect exposed credentials in web applications.
- Utilized Trufflehog to enhance cybersecurity measures in development pipelines.

Chatbot Implementation Using IBM Watson Assistant May 2023

- Created an AI-powered chatbot capable of answering common questions and guiding users.
- Leveraged IBM Watson Assistant and Watson Discovery for natural language processing and data analysis.

ADDITIONAL EXPERIENCE

Batam State Polytechnic – Batam, Indonesia

Project-Based Learning Participant Aug 2022 – Dec 2022

- Developed various front-end projects using HTML, CSS, JavaScript, and Bootstrap.
- Built and optimized backend systems with PHP (CodeIgniter) and MySQL for academic projects.
